

SAP4NHS

Modern ERP Driving
Operational Efficiency
& Flexibility in the NHS

As a top 5 global IT leader and SAP Global Strategic Partner, NTT DATA leverages 35+ years of expertise and a team of 20,000 to transform healthcare with SAP solutions that enhance efficiency and flexibility.

NHS finance, procurement and logistics teams face key challenges managing legacy, disparate systems within complex digital landscapes.

As an NHS CFO or CPO, you may encounter pressures like:

- Standardising processes and data across siloed entities
- Making real time decisions on reliable data to maintain efficiency
- Workforce shortages impacting investment
- Outdated systems and data-sharing issues blocking digital transformation
- Inefficiencies in scheduling and resource allocation
- Bureaucracy diverting time from strategic planning

We work with you to deliver SAP4NHS on your preferred Cloud Hyperscaler, a tailored ERP solution designed with advanced SAP technology, NHS-specific integrations, deployment accelerators, expert implementation services, and 24/7 support. An integrated ERP platform for individual NHS organisations or shared services across finance, procurement and logistics.

Our accelerators, including pre-configured templates, best practices, and structured change management, enable faster deployment, quicker benefit realisation, and a smoother transition.

“ We chose NTT DATA and SAP as our trusted partners to help realise our ambition of transforming our finance and back office operations, and together we're achieving this vision successfully, step by step.

Julian Miller, Chief Financial Officer

University Hospitals Birmingham
NHS Foundation Trust

SAP4NHS Modular Integrated ERP Platform

NHS Blueprint Integrations, including ESR, GHX, EPR, NHSE Reporting, and Deployment Accelerators
